EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin Zilka (Reg. No. 41,429) on 12 October 2005.

The application has been amended as follows:

The abstract of the present application has been amended as follows:

Please delete – SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT
FOR IMPROVED EFFICIENCY IN NETWORK ASSESSMENT UTILIZING A PORT
STATUS PRE-QUALIFICATION PROCEDURE--.

Examiner has amended the abstract removing the title information. An amended copy of the abstract is attached.

ABSTRACT

A system, method and computer program product are provided for minimizing the duration of a risk-assessment scan. Initially, a plurality of risk-assessment modules are selected each including vulnerability checks associated with a risk-assessment scan. Thereafter, a first set of ports is determined. Such first set of ports is required for communicating with network components subject to the risk-assessment modules associated with the risk-assessment scan. A port scan is subsequently executed on the first set of ports. Based on such port scan, a second set of ports is determined which includes ports unavailable for communicating with the network components subject to the risk-assessment modules associated with the risk-assessment scan. The risk-assessment modules associated with the second set of ports may then be disabled to minimize the duration of the risk-assessment scan.

Allowable Subject Matter

2. Claims 1-3, 6, 8-10, 13, 15-17, 20, 22, 23, 25 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art of record, specifically for example Fudge (U.S. 6,205,552), discloses methods for identifying shareable devices on a network that should be scanned for vulnerabilities (column 2, lines 31-40). The prior art references do not teach alone or in combination the specific limitations within the independent claims. For example, independent claim 1 discloses the use of risk-assessment modules and the ability to disable risk-assessment modules associated with ports that are deemed to be unavailable for communication. Therefore, the independent claims have allowable subject matter and are deemed allowable over the prior art of record. The dependent claims of the independent claims are also deemed allowable. Applicants arguments filed 02 August 2005 have been considered and are deemed persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
